

# **LEGENDS IN STATISTICAL COMPUTING**

**Hadley Wickham** (1977–present)

*Key Contributor to the R Ecosystem*

Hadley Wickham has made significant contributions to the R ecosystem by developing popular and transformative packages like ggplot2, dplyr, and the tidyverse. His innovations have made R more accessible and powerful, playing a vital role in transforming the way data is analyzed and visualized.

**Wes McKinney**

*Creator of the pandas Library*

Wes McKinney developed the pandas library, an essential data manipulation and analysis tool in Python. Pandas revolutionized data analysis with its powerful and flexible data structures, establishing a foundation for data wrangling and analysis in Python.

**Department of Statistics,  
COMSATS University Islamabad, Lahore Campus**
