

LEGENDS IN STATISTICAL COMPUTING

Ross Ihaka (1948–present)

Co-Creator of the R Programming Language

Ross Ihaka is a co-founder of the R programming language. Developed initially as a statistical computing suite, R has become one of the most widely used software environments for statistical computing and analysis, making it a cornerstone in statistical research and data science.

Guido van Rossum

Creator of the Python Programming Language

Guido van Rossum is the creator of Python, a versatile programming language that has become a key tool for statistical computing, data analysis, and machine learning. Python is widely popular for its simplicity and extensive libraries like NumPy, SciPy, and pandas.
